

9. Write programs of typescript for control flow statements

1.If statement

```
const max =100;let counter;  
if(counter<max) {  
  counter++; } console.log(counter  
); // 1
```

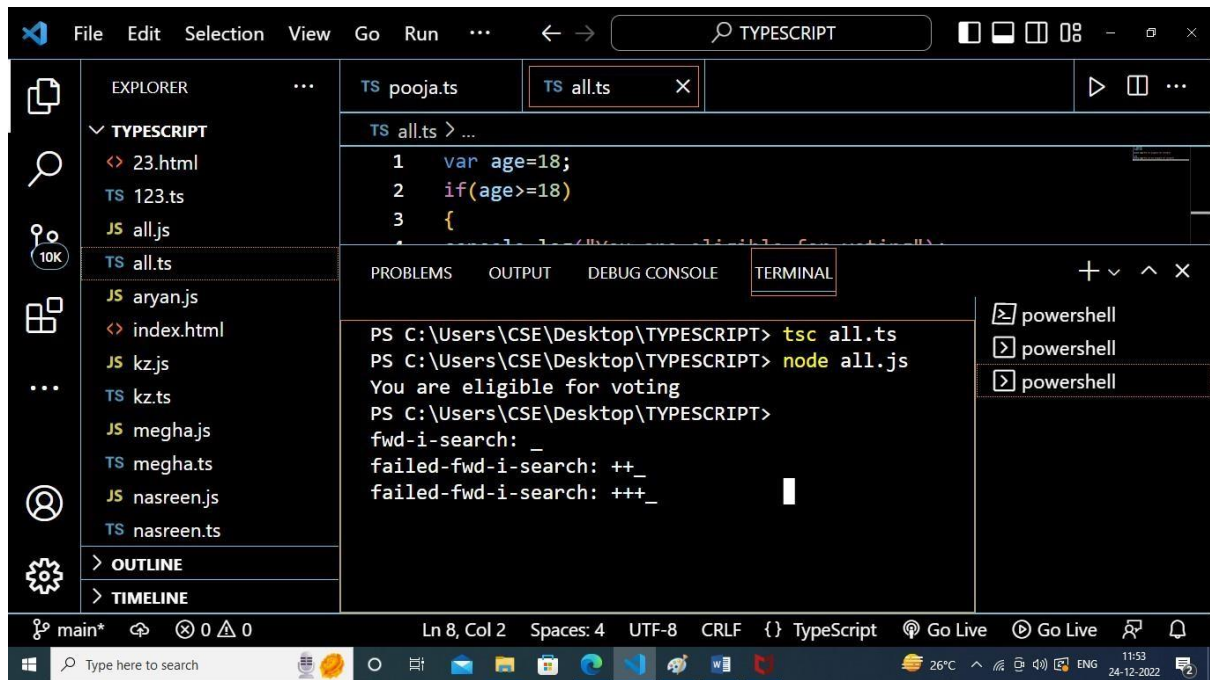

Output:-

2.If else statement

```
var age=18;  
if(age>=18)  
{  
  console.log("You are eligible for voting");  
}  
else{  
  console.log("You are not eligible for voting");  
}
```

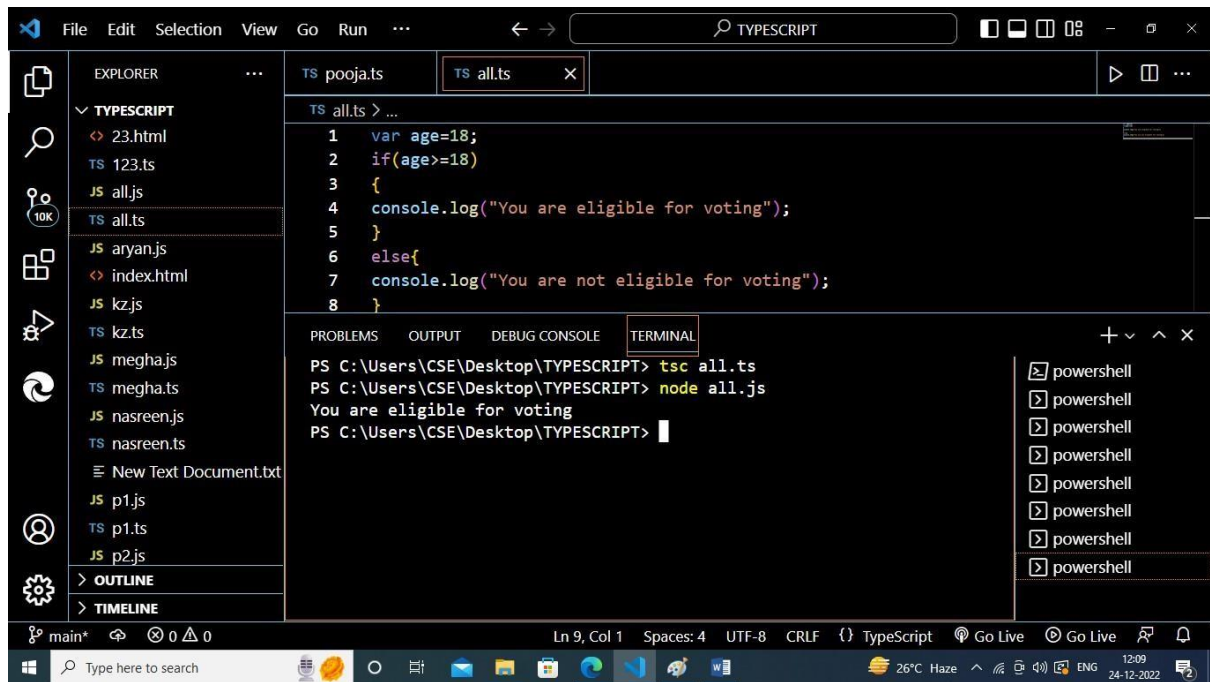

Output:-

3.If else If Statement

```
var age=18;
if(age>=18)
{
    console.log("You are eligible for voting");
}
else
{
    console.log("You are not eligible for voting");
}
```

Output:-

4.Switch Statement

```
let targetId ='cs';
switch (targetId) {
case 'at':
    console.log('Automobile
Engineering');          break;      case 'ec':
console.log('Electronics and Communication
Engineering');          break;      case 'cs':
console.log('Computer science and Engineering');
break; case 'me':      console.log('Mechanical
Engineering');          break;      default:
console.log('Invalid Branch');
    break;
}
```

Output:-
